Bella linea 12 cup coffee maker manual

Photo Courtesy: Pixabay If you're like many typical Americans, you enjoy a hot, fresh cup of coffee in the morning (or maybe even all day). The surge in popularity of single cup coffee makers has made it super easy to enjoy the hottest, freshest cup each and every time. The only problem? The market has expanded to include a lot of choices, which can make it overwhelming to pick the right one. How do you find the single cup coffee maker that's right for you? Start by comparing the features that matter most to you to the best available options on the market. MORE FROM CONSUMERSEARCH.COM Page 2 [Carlo's Lines/flickr] Adding two 1/3 cups gives you 2/3 cups. In decimals, 1/3 of a cup is .33 cups, so .33 cups plus .33 cups equals .66 cups. The United States customary cup holds 8 fluid ounces. Since 1/3 or .33 of 8 ounces is 2.64 ounces, 2/3 U.S. fluid cups or 1/3 U.S. cups plus 1/3 U.S. cups is equivalent to 5.28 U.S. fluid ounces. The British imperial cup holds 10 imperial ounces. This means that 1/3 or .33 of 10 ounces is 3.3 ounces. Thus, 1/3 imperial cups plus 1/3 imperial cups is 6.6 ounces. What Are Fractions? Fractions are defined as a part of a whole, written with a top number called a numerator, and a bottom number is called the denominator. A division line called a vinculum separates the numerator and denominator in fractions. Fractions are often presented with a numerator of a lower number than the denominator. However, there are fractions with numerators that are greater than their denominators. Such fractions are called "improper fractions." Improper fractions may be converted into mixed fractions, which is a whole number accompanied by a fraction, such as in 1 1/2. Adding Fractions Adding fractions is easy. With fractions that have an identical denominators such as in 1/3 + 1/3, add the numerators and retain the denominator. Thus 1/3 + 1/3 = 2/3. In fractions that don't have an identical denominator, such as in 1/2 + 1/3, multiply the numerators with the denominators of the other fraction, and then add the results which will be your new numerator. Since multiplying 1x2 gives you 2 and 1x3 gives you 3, adding 2+3 will give you 5, which becomes your new numerator. Next, multiply the denominators of the two fractions, and the result will be your new denominator. Thus, 1/2 + 1/3 equals 5/6. Converting Fractions to Decimals Fractions resemble division formulas because they represent division. In other words, 1/3 means 1÷3, which gives you 0.33. 1/3 cups, therefore, is equivalent to .33 cups and 0.33 cups plus .33 cups equals .66 cups. Cups in U.S. Customary and British Imperial Systems Both the U.S. customary and British imperial system units of measurements are based on the old English system. While the units measurements for length, weight, distance, and area are identical in both the U.S. customary and imperial systems, their units for volume such as fluid ounces, cups, pints, quarts, and gallons differ. Using the metric system for volume as reference, a U.S. fluid ounce is equivalent to 29.573 milliliters (mL). Since a U.S. fluid cup holds 8 fluid ounces, one U.S. cup holds 236.48 mL — 1/3 or .33 of which is 78.04 mL. This makes 2/3 of a cup equivalent to 156.07. The imperial fluid ounce holds 28.413 mL. Since 1 imperial cup holds 10 imperial fluid ounce, 1 imperial cup is equivalent to 284.13 mL. Using the same calculations as above, 1/3 of an imperial cup is 93.76 mL, and 2/3 of an imperial cup is equivalent to 187.52 mL. The Metric System Cup Although seldom used, the metric system also has its own version of the cup. One metric system cup measures 250 mL. One-third of a metric system cup is 82.5 mL. Therefore, 1/3 metric system cup plus 1/3 metric system cup equals 2/3 metric system cups, which is 165 mL. 28Garantía	29Page 4 2 IMPORTANT SAFEGUARDS When using electrical appliances, basic safety precautions should always be followed, including the following:	1. READ ALL INSTRUCTIONS. 2. Do not touch hot surface. Use handles or knobs only.3. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. 4. Close supervision is necessary when any appliance is used by or near children.5. In order to minimize the risk of property damage, never place the Coffee Maker under cabinets. Make sure the area several feet above the Coffee Maker is clear from all furniture or cabinetry. 6. Do not open top cover while coffee is brewing. Scalding may occur if the covers is lifted or removed during the brewing cycle. 7. Do not use outdoors.8. Unplug unit from outlet when not in use and before cleaning. Allow unit to cool before putting on or taking off parts, and before cleaning. 9. To protect against electrical shock, do not immerse cord, plugs, or appliance in water or other liquids. 10. Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment. NOTE: DO NOT ATTEMPT TO REPAIR THE UNIT YOURSELF. THIS WILL VOID THE WARRANTY. 11. The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock or injury to persons. 12. Never move the appliance by pulling the cord. Do not let the cord hang over the edge of a table or counter or touch hot surfaces. 13. Stand the appliance on a table or flat surface.14. Do not use a cracked glass carafe or a carafe having a loose or weakened handle.15. Only use the glass carafe with this appliance. Handle with care as the glass Page 5 3 FOR HOUSEHOLD USE ONLY SAVE THESE INSTRUCTIONS ADDITIONAL IMPORTANT SAFEGUARDS WARNING: This appliance generates heat and escaping steam during use. Proper precautions must be taken to prevent the risk of burns, fires, or other injury to persons or damage to property.1. All users of this appliance must read and understand this Instruction Manual before operating or cleaning this appliance. 2. The cord to this appliance should be plugged into a 120V AC electrical outlet only.3. Use water only in this appliance! Do not put any other liquids or food products in this appliance. Do not mix or add anything to the water placed in this appliance, except as instructed in the User Maintenance Instructions to clean the appliance. 4. DO NOT attempt to move an appliance containing hot liquids. Allow appliance to cool completely before moving. 5. Keep appliance at least 4 inches away from walls or other objects during operation. Do not place any objects on top of appliance while it is operating. Place the appliance on a surface that is resistant to heat. 6. If this appliance begins to malfunction during use, immediately unplug the cord. Do not use or attempt to repair the malfunctioning appliance. 7. If this appliance falls or accidentally becomes immersed in water or any other liquid, unplug it immediately. Do not reach into the water! Do not use this appliance after it has fallen into or has become immersed in water. 8. The appliance must be left to cool down sufficiently before adding more water to avoid exposure to steam. 9. Always use fresh, cool water in your appliance. Warm water or other liquids, except as listed in cleaning section, may cause damage to the appliance. 10. DO NOT put carafe into a microwave oven.11. DO NOT leave empty carafe on warming plate when appliances is turned ON, as the carafe may crack or become otherwise damaged. 12. The flow valve is located on the bottom of the removable filter holder and is activated when the carafe is removed. This design makes it possible for you to remove the carafe and pour a cup of coffee before the entire carafe is brewed. 13. CAUTION: To prevent injury when utilizing the auto pour and serve feature, replace carafe within 30 seconds of removing during brewing process. Notes on the PlugThis product has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not alter the plug. Notes on the CordThe provided short power-supply cord (or detachable power-supply cord) should be used to reduce the risk resulting from becoming entangled in or tripping over a longer cord. Do not use an extension cord with this product. Always plug directly into a wall outlet/receptacle. Page 6 4 Plasticizer Warning CAUTION: To prevent Plasticizers from migrating to the finish of the counter top or table top or other furniture, place NON-PLASTIC coasters or place mats between the appliance and the finish of the counter top or table top. Failure to do so may cause the finish to darken; permanent blemishes may occur or stains can appear. Electric PowerIf the electrical circuit is overloaded with other appliances, your appliance may not operate properly. It should be operated on a separate electrical circuit from other appliances. Carafe Safety Precautions 1. Do not use a cracked carafe or any carafe with a loose or weakened handle. 2. This carafe is designed to be used only on the warming plate of your Coffee Maker. Do not use in a conventional oven. 3. To avoid breakage, handle carafe with care. Avoid impact. Glass will break as a result of impact. Use care when filling with water to avoid hitting faucet. 4. Do not place hot carafe on cool or wet surface. Allow carafe to cool before washing or adding liquids.5. Do not set empty carafe on a hot heating surface. Do not clean with steel wool pads, abrasive cleanser, or any other materials that may scratch. 6. Do not bump or scratch the carafe. Remove carafe from the warming plate to avoid burning or scorching. Never operate the Coffee Maker with a carafe that has boiled dry. 7. Discard carafe if it is cracked, scratched, or heated while empty for an extended period of time. Coffee Yield 12 Cup Coffee Maker: 12 (5 oz.) cupsNOTE: A 5-oz cup is the American industry standard and is used by most Coffee Maker manufacturers. To fill your favorite over-sized mug, fill Coffee Maker reservoir with enough water for 3 to 4 cups (15 to 20 ounces).WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT REMOVE THE BOTTOM COVER. NO USER-SERVICEABLE PARTS INSIDE. REPAIR SHOULD BE DONE BY AUTHORIZED SERVICE PERSONNEL ONLY. Page 7 5 Getting to Know Your 12 Cup Coffee Maker Product may vary slightly from illustration Control Panel Coffee Maker Lid Water Reservoir Water Level Indicator (not shown) Removable Filter Holder Permanent Coffee Filter Pause and Serve Flow Valve (not shown) Control Panel Warming Plate Base Carafe Carafe Lid Carafe Handle Polarized Plug Cord Storage(not shown) Items sold in Canada Items sold in the United States of America Page 8 on a flat, clean surface. 2. Before preparing coffee, thoroughly clean the glass carafe with lid, removable filter holder and permanent coffee filter in hot, sudsy water. Rinse and dry. Replace disassembled parts. See Care & Cleaning Instructions for a detailed description. 3. Clean the inside of the Coffee Maker by brewing 2 full carafes of tap water (see "setting up the machine"). Do not add the permanent coffee filter or ground coffee for this initial cleaning. NOTE: At the end of the first cycle, allow 15 minutes for the unit to cool. 4. Brew a second carafe of fresh water. 5. Wait an additional 15 minutes to allow the unit to cool before brewing your first carafe of coffee. Setting up the machine IMPORTANT: Before brewing, always check to make sure water level is past the MIN line and add water if needed. Never exceed the MAX fill line. NOTE: The amount of brewed coffee will always be less than the amount of water placed into the water reservoir; as much as 10% is absorbed by coffee grounds and filter. 1. Lift to open the Coffee Maker lid. Fill carafe with cold tap water and pour into water reservoir at the back of the unit. The stepped water level indicator can be easily viewed inside unit. 2. Place empty carafe on the warming plate. 3. Place the permanent filter in the removable filter holder. Measure 1 level tablespoon or 1 scoop with the provided scooper cup, of drip or regular grind coffee for each cup of coffee desired. For stronger or milder coffee, adjust amount of coffee to suit your taste. 4. Lower the filter holder down into the housing. Close the lid.5. Plug the power cord into 120V/60HZ power supply socket, the background indicator will be illuminated. "AM 12:00 " CLEAN " will flash. Set the clock by using the HOUR/HR and MIN buttons, and press SEL. The backlight indicator will go into sleep mode within 60 seconds if no further buttons are selected. 6. Press the START or button *. The Coffee Maker will begin the brew cycle. NOTE: To interrupt the brew process at any time, press and hold the START or button * until you hear a beep. The screen will display icon and TIME since last brew. The warming plate will still be working. To turn it off, hold START or button * again until clock appears. 7. Upon completion of the brew cycle, wait at least 1 minute until the dripping coffee from the flow valve into the carafe has stopped. The carafe lid should be kept in place to facilitate safe serving and help keep coffee at a proper serving temperature. Tilt the carafe slightly and pour hot coffee very slowly, so that the flow of the brewed coffee does not exceed the width of the spout. 8. Press and hold the START or button * to turn the Coffee Maker off when the carafe is empty or when unit is not in use. Setting the clock 1. Press HOUR/HR button to select the Hour. Press and hold HOUR/HR to toggle quickly.2. Press MIN button to select the minutes. Press and hold MIN to toggle quickly.3. When the correct time is displayed press SEL. The coffee maker will make an audible beep sound. 4. Re-set the clock: press Mode button six times until ! CLEAN flashes, press SEL button, the time will flash, follow clock setting method. Brew strength selection 1. Regular strength coffee (by default): press Mode button once, ! CLEAN will flash, press SEL button to confirm, then press the START or button *. The unit will beep and begin to brew regular coffee. 2. Gourmet strength coffee: press Mode button twice, ! CLEAN will flash, press SEL button to confirm, then press the START or button *. The unit will beep and begin to brew gourmet strength coffee. 3. Bold strength coffee: press Mode button three times, ! CLEAN will flash, press SEL button to confirm, then press the START or button *. The unit will beep and begin to brew Bold strength coffee. 4. 1-4 CUP Mode: press Mode button four times, 1-4 ! CLEAN will flash, press SEL button to confirm, then press the START or button *. The unit will beep and begin to brew in 1-4 CUP Mode. The 1-4 Cup Mode is ideally used for making 1-4 cups of coffee therefore 1-4 cups of water should be poured into the water tank accordingly. If more than 1-4 cups of water are poured in, then everything poured in will brew. * Depending on the model number of your unit, for US CM4282-A, for Canada CM4282-CA.
